

CROWDFUNDING ELIGIBILITY FORM

Please fill in this form to the best of your ability. This will help determine if your dam removal is eligible for crowdfunding. When you have filled in the form completely, please send to iwan@fishmigration.org along with a minimum of five high quality photos and a short video of the dam and local site.

If any of the answers are unknown, please fill in n/a.

Please fill in the appropriate responses:

Are the required funds under 20,000 EUR?	
Does the project improve local species populations?	
Provided we fund the removal, can it be removed within the year?	
Do all of the stakeholders and local communities agree to the dam removal? If not, explain.	
Is there project team capacity to support crowdfunding campaign outreach?	
Can we organize a visit with press and potential donors at the location?	
Are there any other financial investments contributing to the dam removal?	

Please indicate the reason for dam removal (i.e. restore river connectivity, improve water quality, avoid downstream channel degradation, increase biodiversity, improve social or economic benefits, avoid maintenance costs, part of a greater river restoration project, improve threatened or iconic species populations, etc.):

Please provide the following background information:

Dam	
River	
Total length of river	
Watershed	
Project manager/initiator	
Organization facilitating the dam removal	
Local Water Management Authority	
Type of structure (i.e. dam, weir, culvert, etc.)	
Fishway present?	
Preferred planning (start and end of operations)	
Total length of river opened up after removal (i.e. distance between next dam/obstacle, down and upstream.	
Distance to next upstream barrier?	

Please provide the following barrier details and location information:

Municipality	
Province	
Country	
Location google maps	
Distance to sea	
Height (m)	

Please provide the following barrier details and location information:

Width (m)	
Reservoir length (km)	
Original function	
Start of use	
End of use	

Indicate any legal issues:

Who owns the dam	
Does the dam owner consent to removal	
Local regulations for dam removal	

Please provide the estimated costs for the dam removal:

Estimated cost for preparation and environmental assessments (if applicable)	
Estimated cost of dam removal	
Total amount to be crowdfunded	

How will the local community be involved in the process? What opportunities are there to ensure transparency between project team and all stakeholder and community member?

--

Please list the local species associated within each category and how they will be affected by the dam removal (i.e. new spawning ground for trout with result in an expected increase in populations):

Fish	
Birds	
Mammals	
Plants	
Invertebrates	
Other	

Please indicate the expected impacts on the local community (economy, recreational activities, improvement of landscape and living quality, etc.):

Please indicate the expected impact on the rivers health:

Waterbody in Water Framework Directive policies?	
Current and expected WFD ecological water quality status of river	
Current and expected WFD chemical water quality status	

WHEN YOU HAVE FILLED IN THE FORM COMPLETELY, PLEASE SEND TO IWAN@FISHMIGRATION.ORG ALONG WITH A MINIMUM OF FIVE HIGH QUALITY PHOTOS AND A SHORT VIDEO OF THE DAM AND LOCAL SITE.
